1

# Visa’s Connector Strategy

©2024 Visa. All rights reserved. Visa Confidential

# We are expanding the reach of our network

Connector partnerships will create more ways to pay and be paid

# Our goal is to enable customers and merchants to pay and receive payments seamlessly regardless of form factor

3

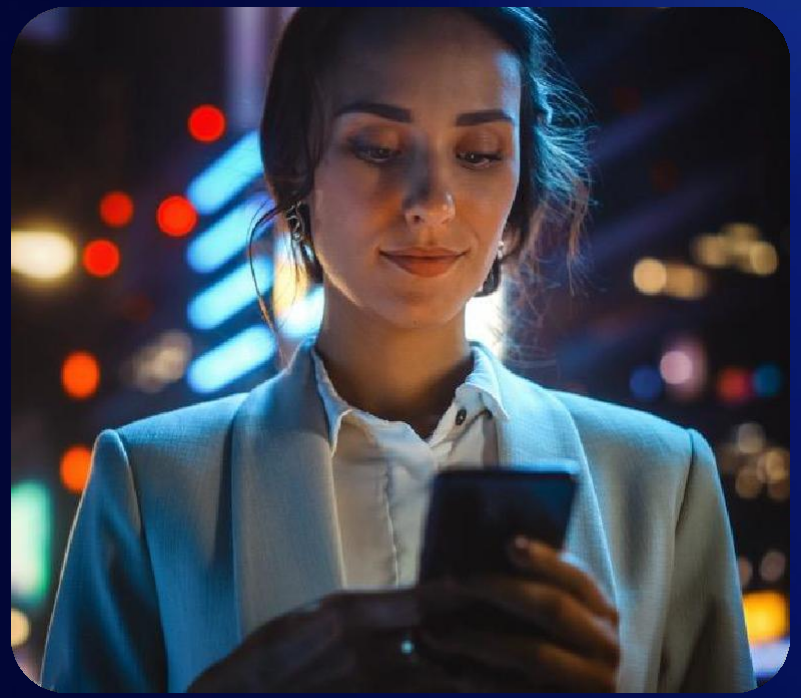

# Introduction to Visa QR Connector

MORE WAYS TO BE PAID

©2024 Visa. All rights reserved. Visa Confidential

VISA

# Key benefits in opening merchant QR network for 4.6B+ Visa Cards

Key Benefits

- **Single connection** with Visa to access an expanded consumer base of 4.6B+ credentials in more than 190+ countries and territories
- **More traffic and revenue** for your merchants
- **Richer economics**
- **Broader, longer-term partnership** with Visa

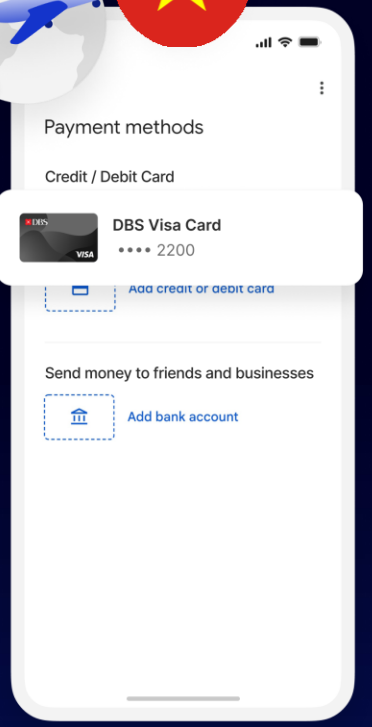

*Markets, logos and apps are for illustrative purposes only*

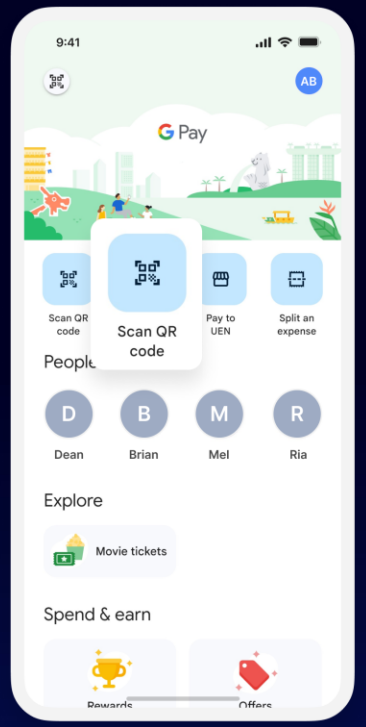

# Enabling users to pay at Viettel's QR merchant by scanning

Consumers seamlessly pay abroad with their local Visa card via Scan-to-Pay

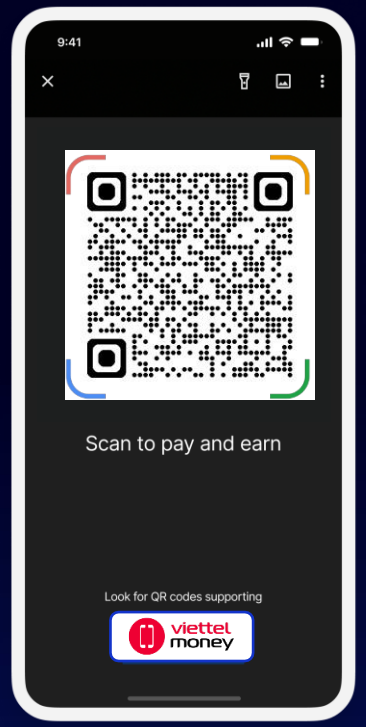

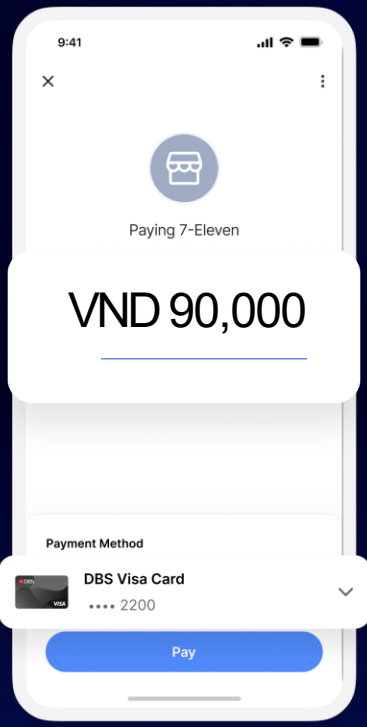

DBS SG Visa Card added in GPay

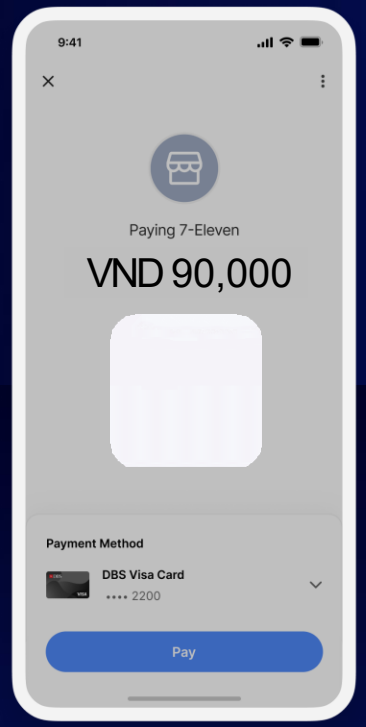

Payment by 'Scan QR Code'

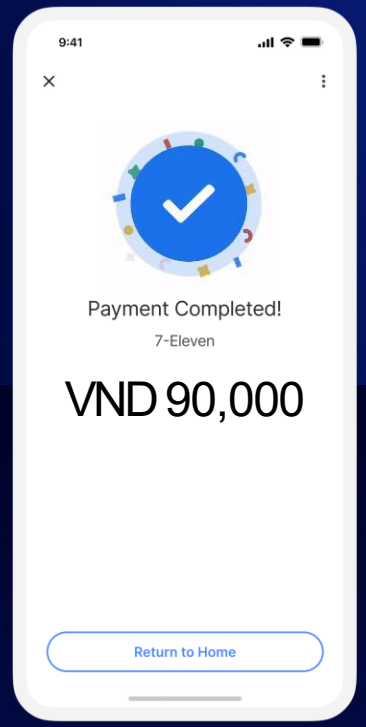

Scans Viettel's QR Code

Input amount and pay with DBS Visa Card on file

Payment authentication through Face ID

Payment Completed

# How this works: Transaction Flow for Scan to Pay

1 Tourist with Wallet app (enabled with Visa PBW SDK) **scans code** at a merchant

Merchant

*Payment info sent to Visa QR engine*

2 **Visa resolves QR code and determines Acquirer/ QR connector** to handle request

Visa QR Engine

New Visa capability to connect to any QR network globally

*Hand off to QR Connector*

3 QR Connector **extracts payee info** from QR code & **forwards details to Acquirer**

Acquirer

viettel money

New participant in txn flow; provides infra link to multiple QR providers

*Payment notification*

5 Merchant

*Authorization request*

4 Connector performs BAU flow for cardholder authorization

# Visa Accept: Threshold & transaction limits, IRF & Pricing

| Type | Maximum payment volume per month | Transaction limits | |
|---|---|---|---|
| | | Velocity per month | Transaction size |
| Visa Accept transaction limits | Max. $4,000 / VND100M | Max. 2,000 transaction | $300 / VND 8M |

| Type | Descriptions | Economics | |
|---|---|---|---|
| | | IRF | Acq. fees |
| Visa Accept Economics | Ad valorem with cap (Cap set for $10 transaction size / VND250k) | 10bps; cap at $0.01 (VND250) | 10bps; cap at $0.01 (VND250) |

## After 1 Feb 2027

| Type | Descriptions | Economics | |
|---|---|---|---|
| | | IRF | Acq. fees |
| Visa Accept Economics | Transaction < VND200,000 | 0 | 0 |
| | Transaction >= VND200,000 | VND200 (~USD0.008) | USD0.002 |

# Graduation path towards SMB program and full card acceptance

Visa Accept pilot thresholds set to reduce cannibalization and create pathway for graduation into SMB

**Start with Visa Accept at MDR ~Zero through issuers banking app...**

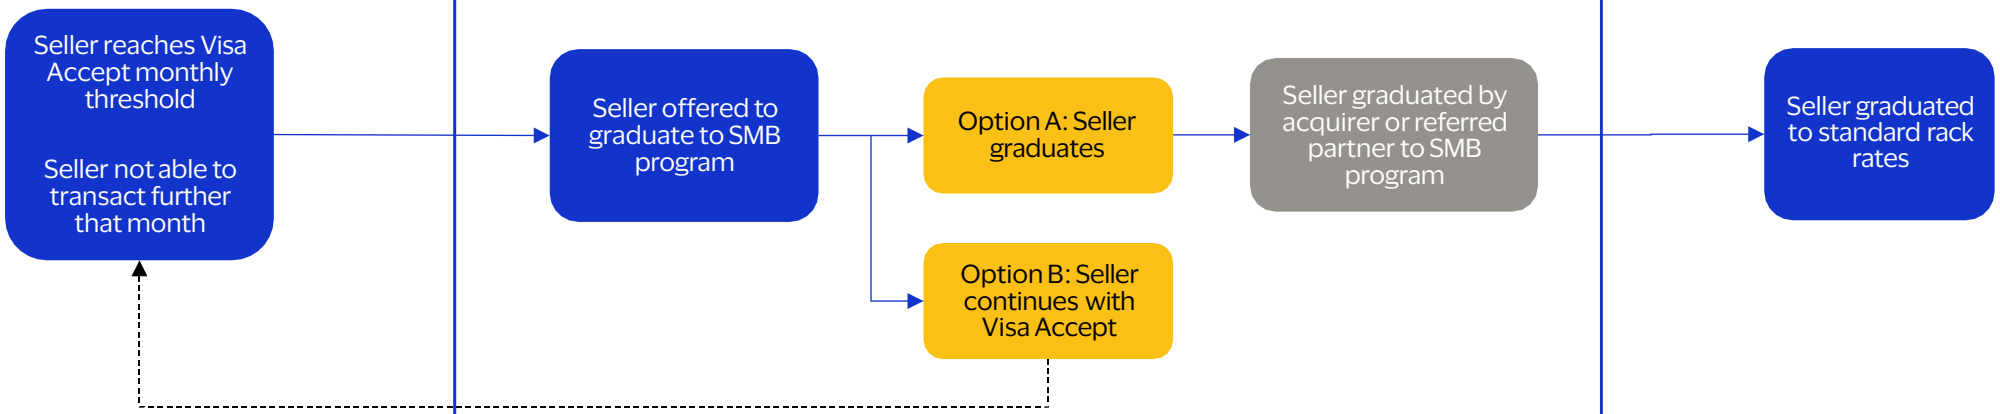

| Visa Accept | Monthly threshold |
|---|---|
| Volume | $4,000 / ~ VND 100M |
| Velocity | 2,000 transactions |
| Ticket size | $300 / ~ VND 8M |

**Graduate to SMB Program at MDR <1% through a mobile app or low-cost acceptance device...**

| SMB Program | Approx. Monthly threshold |
|---|---|
| Volume | $7,000 / ~ VND 180M |
| Velocity | No limit |
| Ticket size | No limit |

**Grow into full card acceptance with multiple devices.**

| Rack rate | Approx. Monthly threshold |
|---|---|
| Volume | No limit |
| Velocity | No limit |
| Ticket size | No limit |

# Visa Acceptance Platform

Nguyen Nguyen

©2025 Visa. All rights reserved. Visa Confidential

# Visa Acceptance Platform – the world's open payment platform

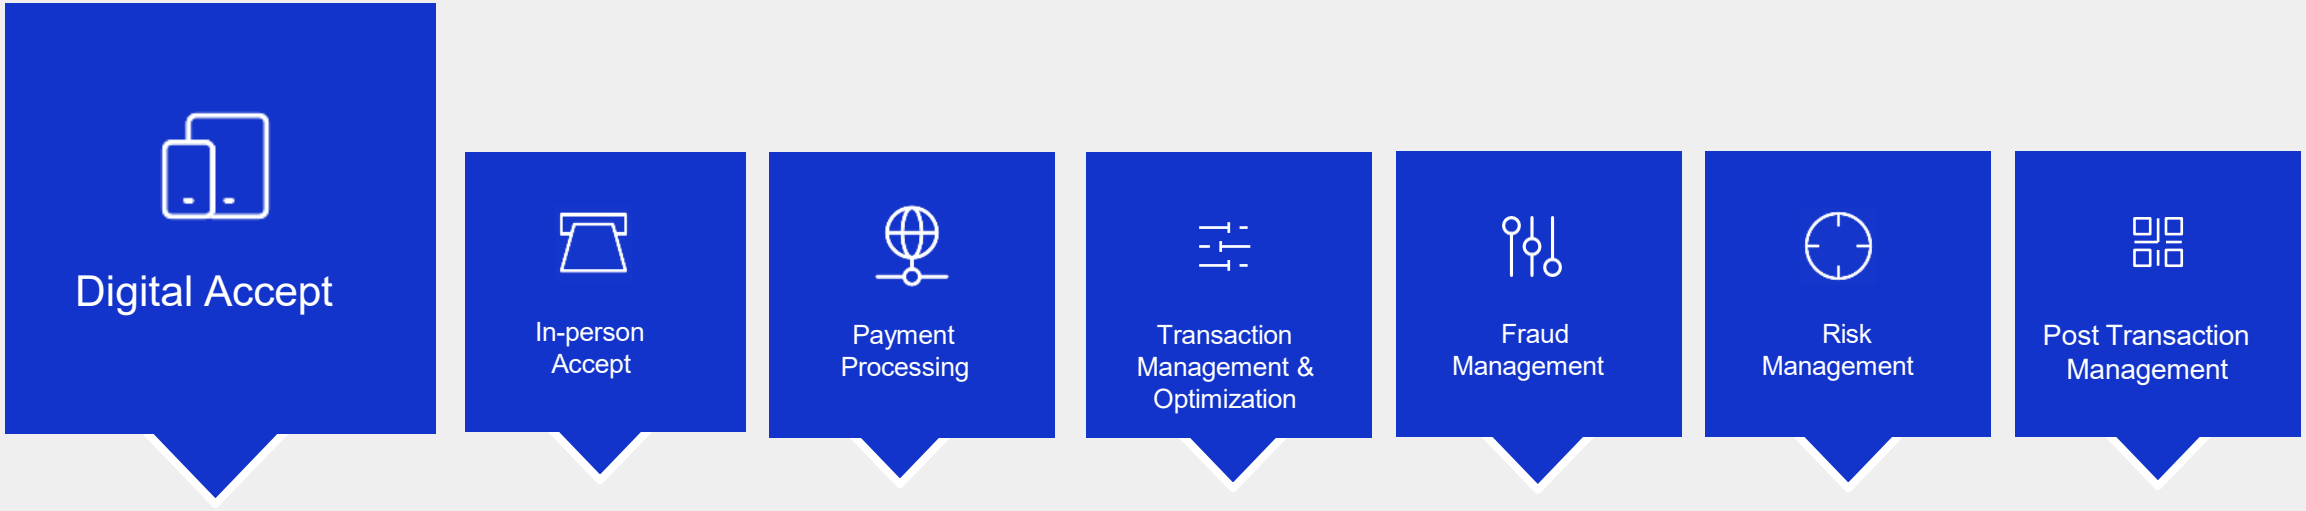

A resilient platform with modular payment services & pre-integrated partner solutions operating 24x7 at industrial scale

[1] Cybersource actual peak transactions per second reached 5300 TPS on July 16, 2021. [2] Measured and validated by the Visa Operations and Infrastructure monthly reporting, as reported on Jan 1, 2025. [3] Total count of all transactions that have gone through ics_auth and ics_ap_auth services measured and validated for Visa Acceptance Solutions in CY2024. [4]Visa Acceptance Platform is on-track to have 100+ registered ISVs by end of Q3 (June) 2023. This forward-looking statement speaks only as of projections in place as of February 2023 and is not a guarantee of future performance and is subject to certain risks, uncertainties and other factors, many of which are beyond our control and are difficult to predict.

Visa Acceptance Solutions

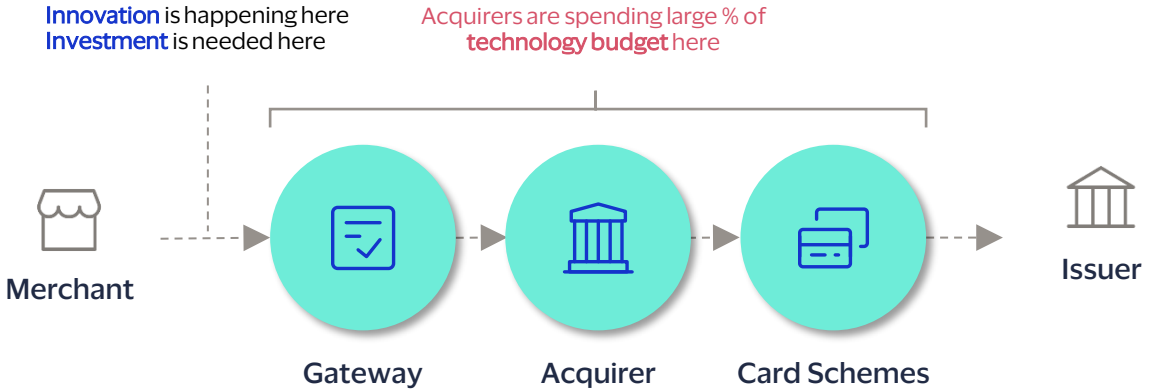

# We are transforming the industry with open acceptance platform

Helping our partners focus on **innovation & customer experience** for business growth

**Today**

## Switch-to-Acquirer (S2A) Processing

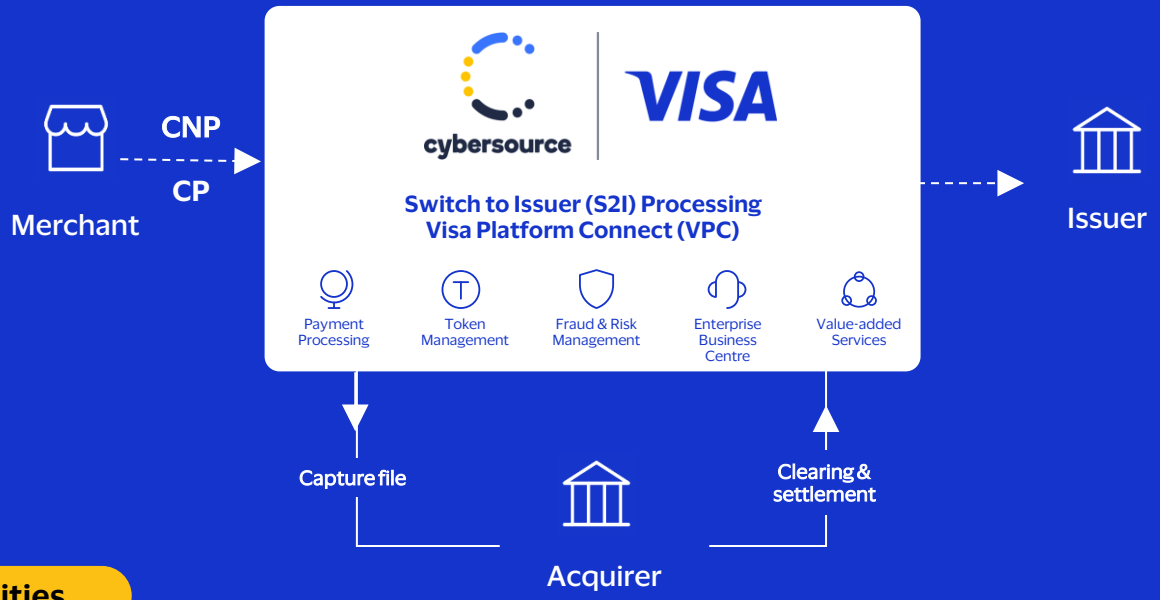

- Resiliency & compliance driven roadmap impacting innovation & growth potential
- Fragmented CNP/CP channels limiting capability to win large merchant opportunities
- Long lead-time/cost in certifications due to dependency on multiple parties & acquirer host

**Tomorrow**

## Switch-to-Issuer (S2I) Processing

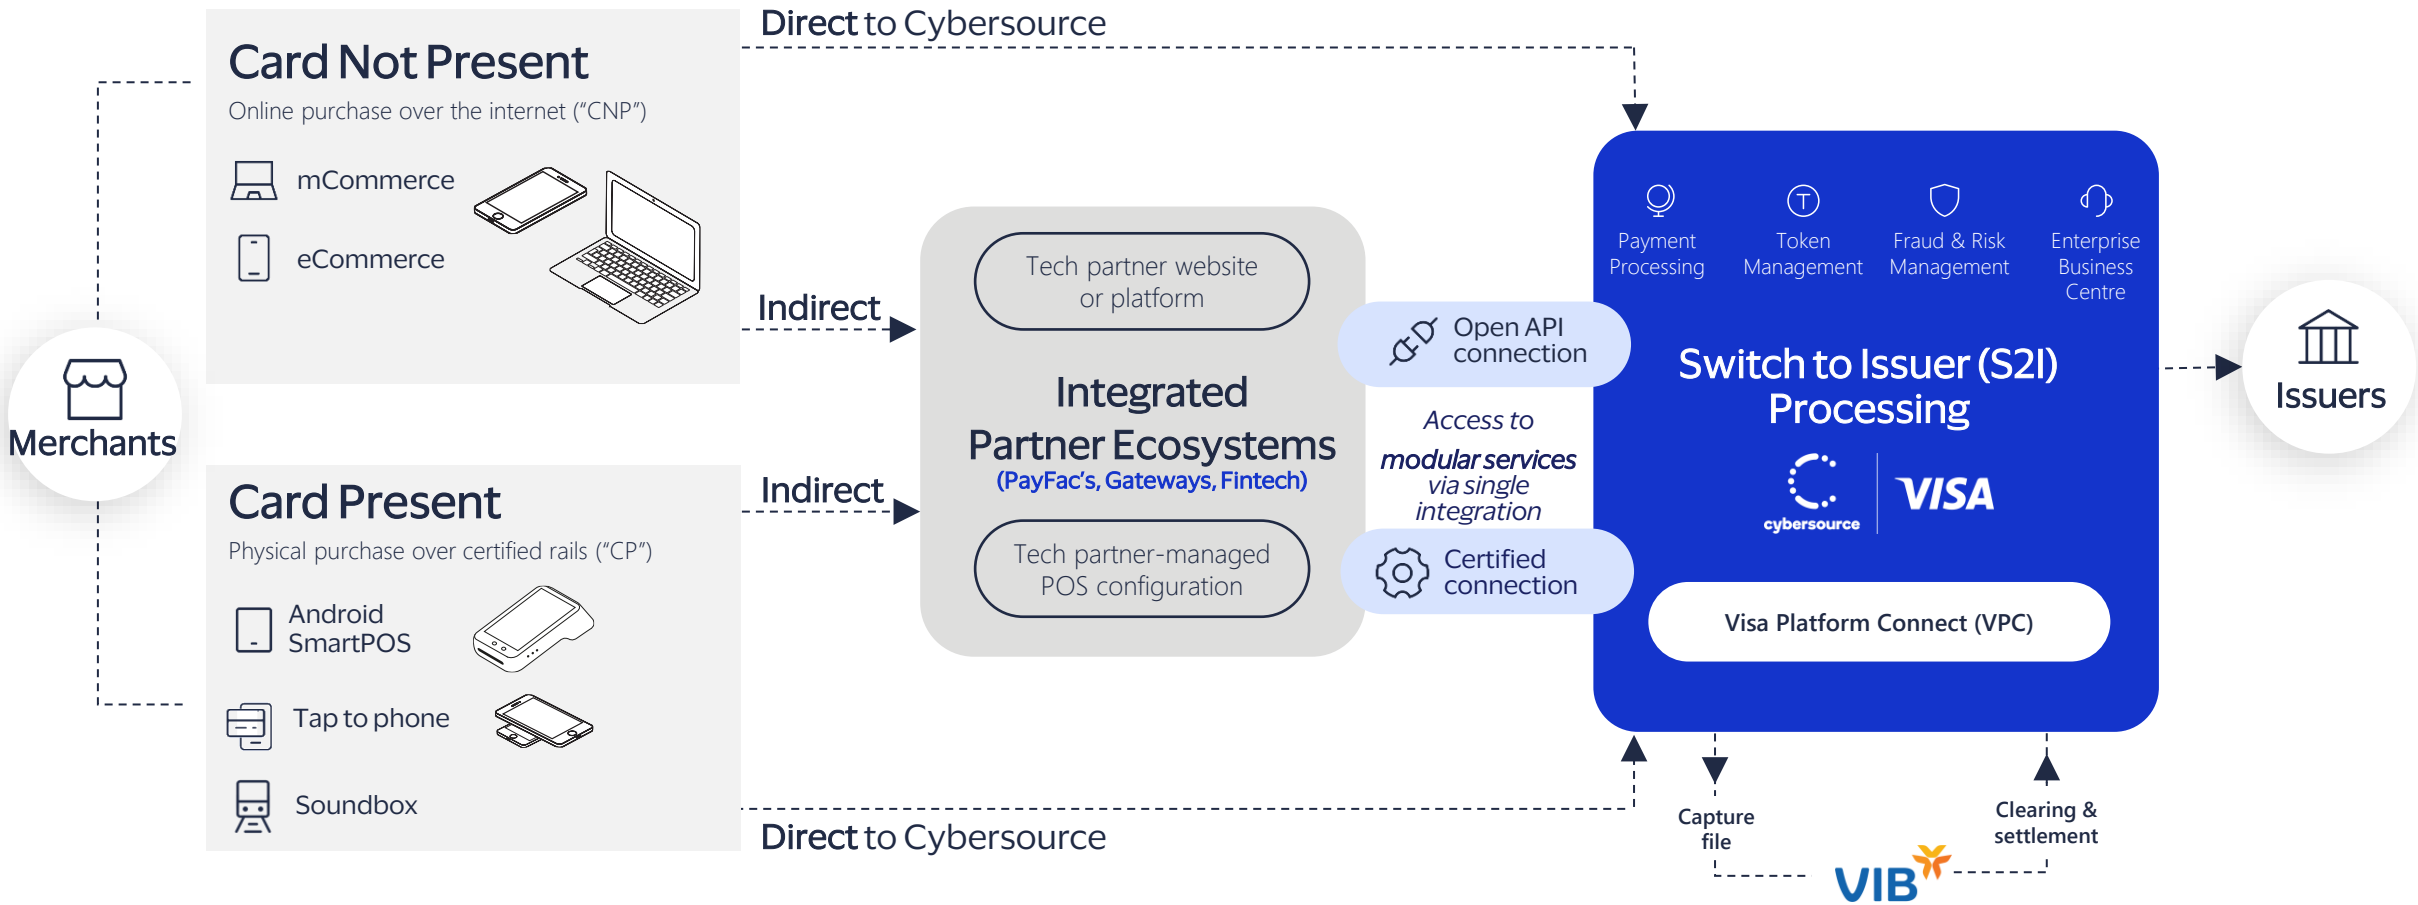

- Complete CNP & CP channel proposition for merchants
- Secure & resilient platform with 99.999% up-time
- Streamline acquirer integration, no auth flow development
- Tap into hundreds of pre-integrated ISV/Tech partner ecosystem
- Reduce fraud loses & increased authorisation rates
- Manage scheme compliance mandates
- Decreased infrastructure investment and other cost benefits

VISA **Both models can co-exist to add resiliency & growth opportunities**

Visa Acceptance Solutions

# You can use Visa Acceptance platform flexible architecture to suit its go to market strategy - resiliency across channels, direct or indirect merchant acquisition parallel to in-house host solution.

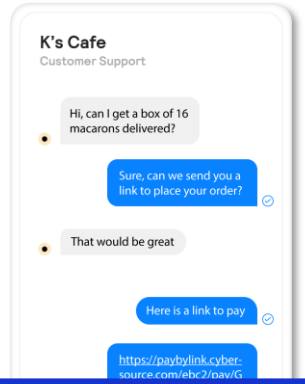

©2026 Visa. All rights reserved.

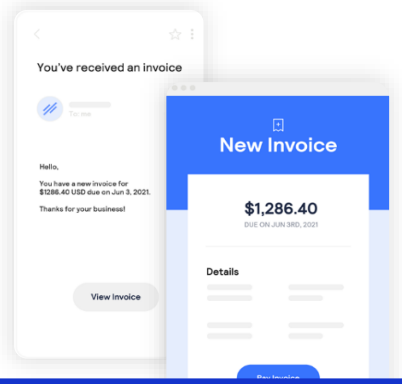

# Combined with In-person Accept, Visa Acceptance Solutions enables acquirers to deliver online card acceptance for SMBs

## Completing a true end-to-end omnichannel payments platform

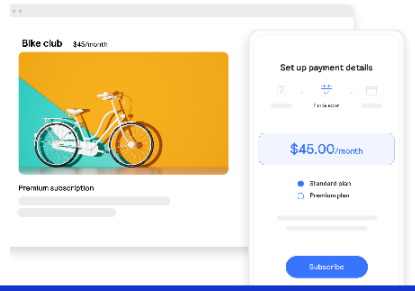

### Pay-By-Link

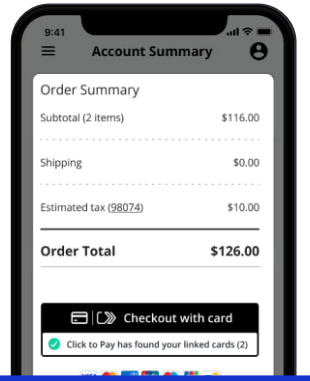

### Invoicing

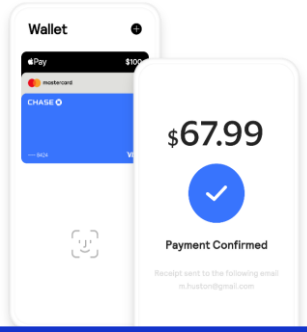

### Recurring Billing

### Click to Pay

### Token Management Services (TMS)

## Key Benefits & Examples

**Create and send a secure payment link,** checkout button, and QR code to accept payments

E.g., Home bakery sending a payment link through Instagram messages

**Send digital invoice easily** and track payments with real-time notifications

E.g., Freelance graphic designer sending a digital invoice after completing a project

**Accept recurring payments** via all major payment cards and regional cards in multiple currencies

E.g., Fitness studio charging monthly membership fees

**Save time and effort** when adding Click to Pay to checkout

E.g., Small e-commerce apparel shop using Click to Pay for faster checkouts

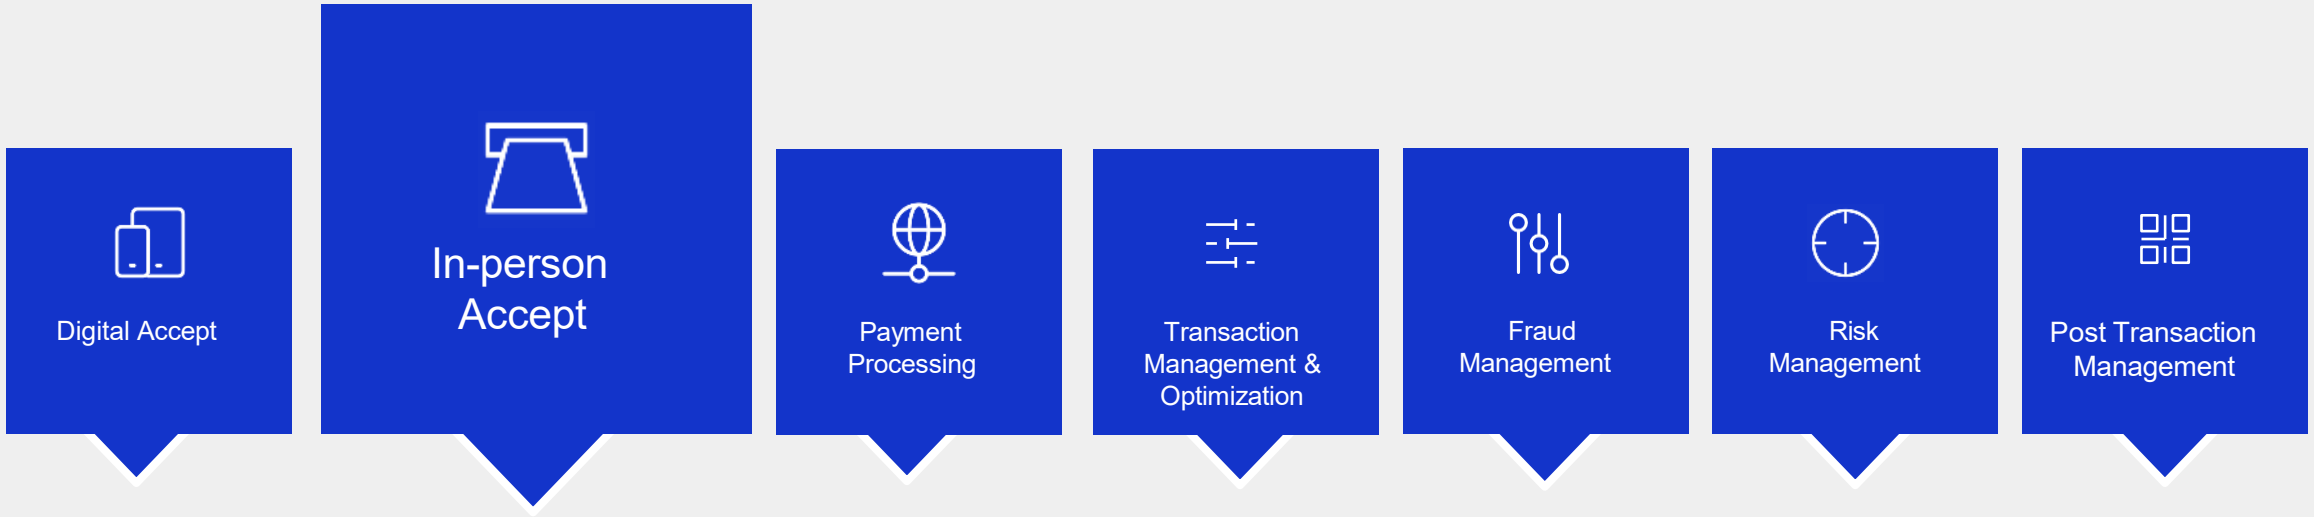

**Securely handle sensitive card information** by replacing it with network tokens

E.g., Local meal subscription service using TMS to keep customer payment details updated

## Token Management Services

# Improve revenue streams and deliver standout benefits through tokenization and account updates

**3%**
### Authorisation Rate Lift[1]
Global average for Visa Token CNP transactions

**28%**
### Fraud Reduction[2]
Visa Token vs PAN-based CNP transactions

**35%**
### Customer Revenue Maintenance[3]
Percentage of customers who you maintain versus lose due to changing payment credential information

## Business Value

- Reduced costs
- Reduced risk
- Operational efficiencies
- Increased revenue
- Lower basket abandonment
- Higher authorisation rates

1. VisaNet, Jan–Mar 2022.Visa credit and debit global card-not-present transactions for tokenised vs non-tokenised credentials. Auth rate is defined as approved authorisations divided by total authorisation attempts based upon first attempt of a unique transaction. 2. VisaNet Data, Global, YoY comparison between FY19 Q4 and FY20 Q4 share of token vs non-token PV for merchants with average 1k CNP token transactions per month. 3. U.S. statistics, cited in Credential-on-file Pain Point Research conducted by Engine Group, Inc., June 2018

# Token Management Services

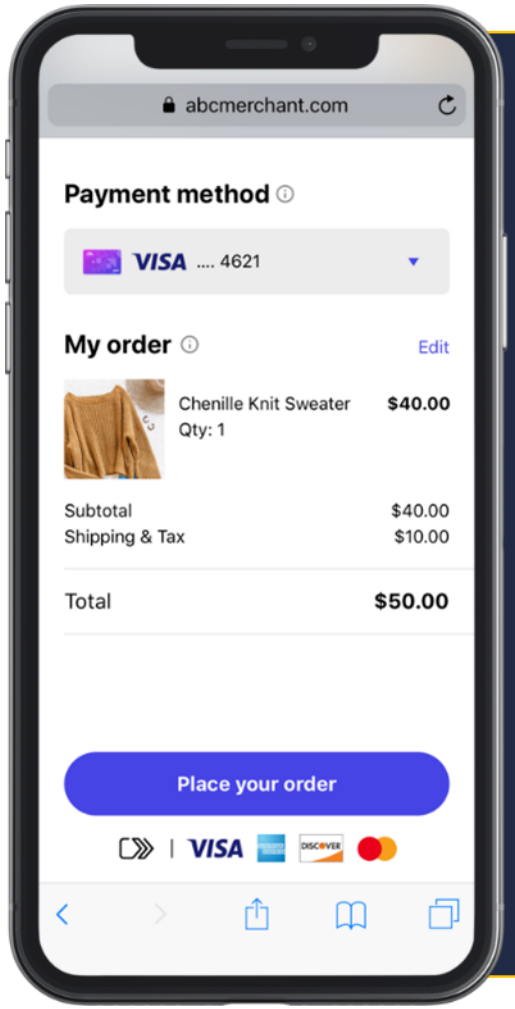

Enable repeat customers to pay quickly and securely

Store multiple credentials on file for each customer

Standard tokens enable you to communicate with Cybersource in a more secure manner, thus limiting your PCI responsibility

Network tokens automatically update your customers' card details when their card is lost or expired and they're issued a new one.

No more chasing failed payments or asking clients to update details.

| **Account Takeover Protection** | **Decision Manager** | **Payer Authentication (3DS)** | **Verifi** Present, Resolve, Inform, Recover |
| • Profile creation and risk rules<br>• Anomaly detection<br>• Response mechanism | • Rich data from Visa's network<br>• Instant AI risk decisions<br>• Identity behavior analysis | • Complete control<br>• Shift liability | • Embrace automation<br>• Global Visa dispute resolution<br>• Pricing model |

Create a fraud prevention strategy that better aligns with your business priorities, helping **support your growth**

# How does it work?

It starts with insights from your customers

©2025 Visa. All rights reserved. Visa Confidential

# Your customers come with a unique **shopping history**

Decision Manager uses its **global view** and **world-class artificial intelligence...**

...combined with **real-time transaction data** to provide the insights you need to **focus on the positive and approve more good transactions**

HISTORICAL DATA

**Identity dynamics**
Illuminate identity interactions

**Risk**
Pinpoint known negative elements

**Velocity**
Track frequency of key events

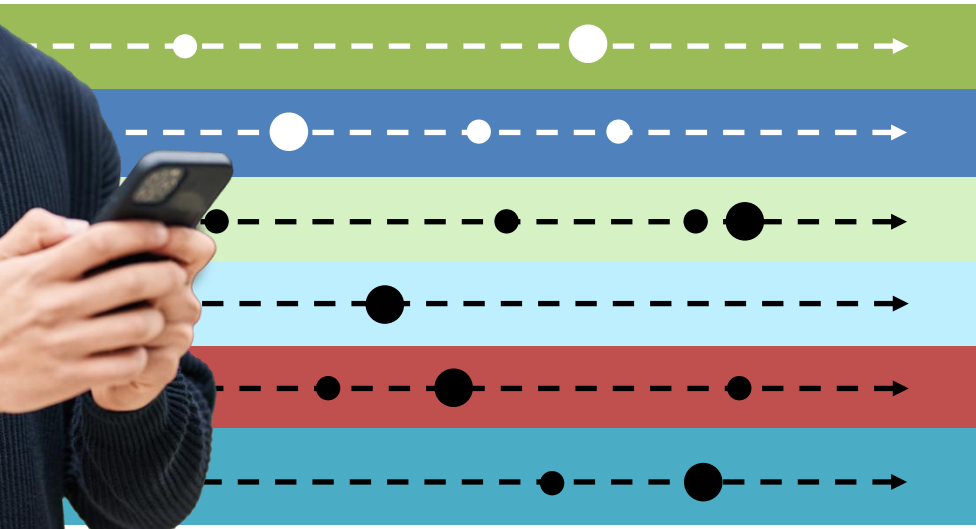

**Anomalies**
Identify questionable data and outliers

**Global activity**
Evaluate geographic relationships

**Behavior**
Analyze habitual consumer patterns

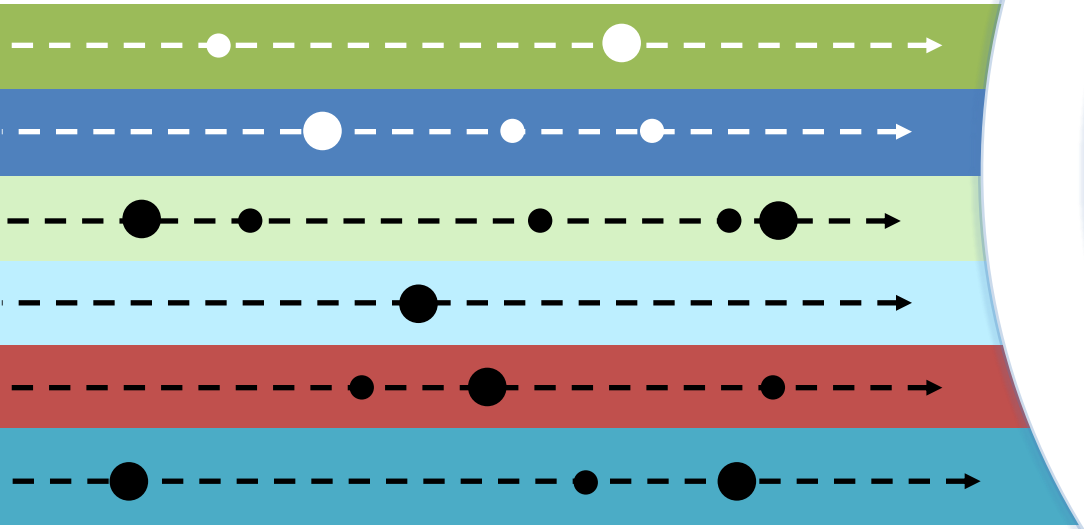

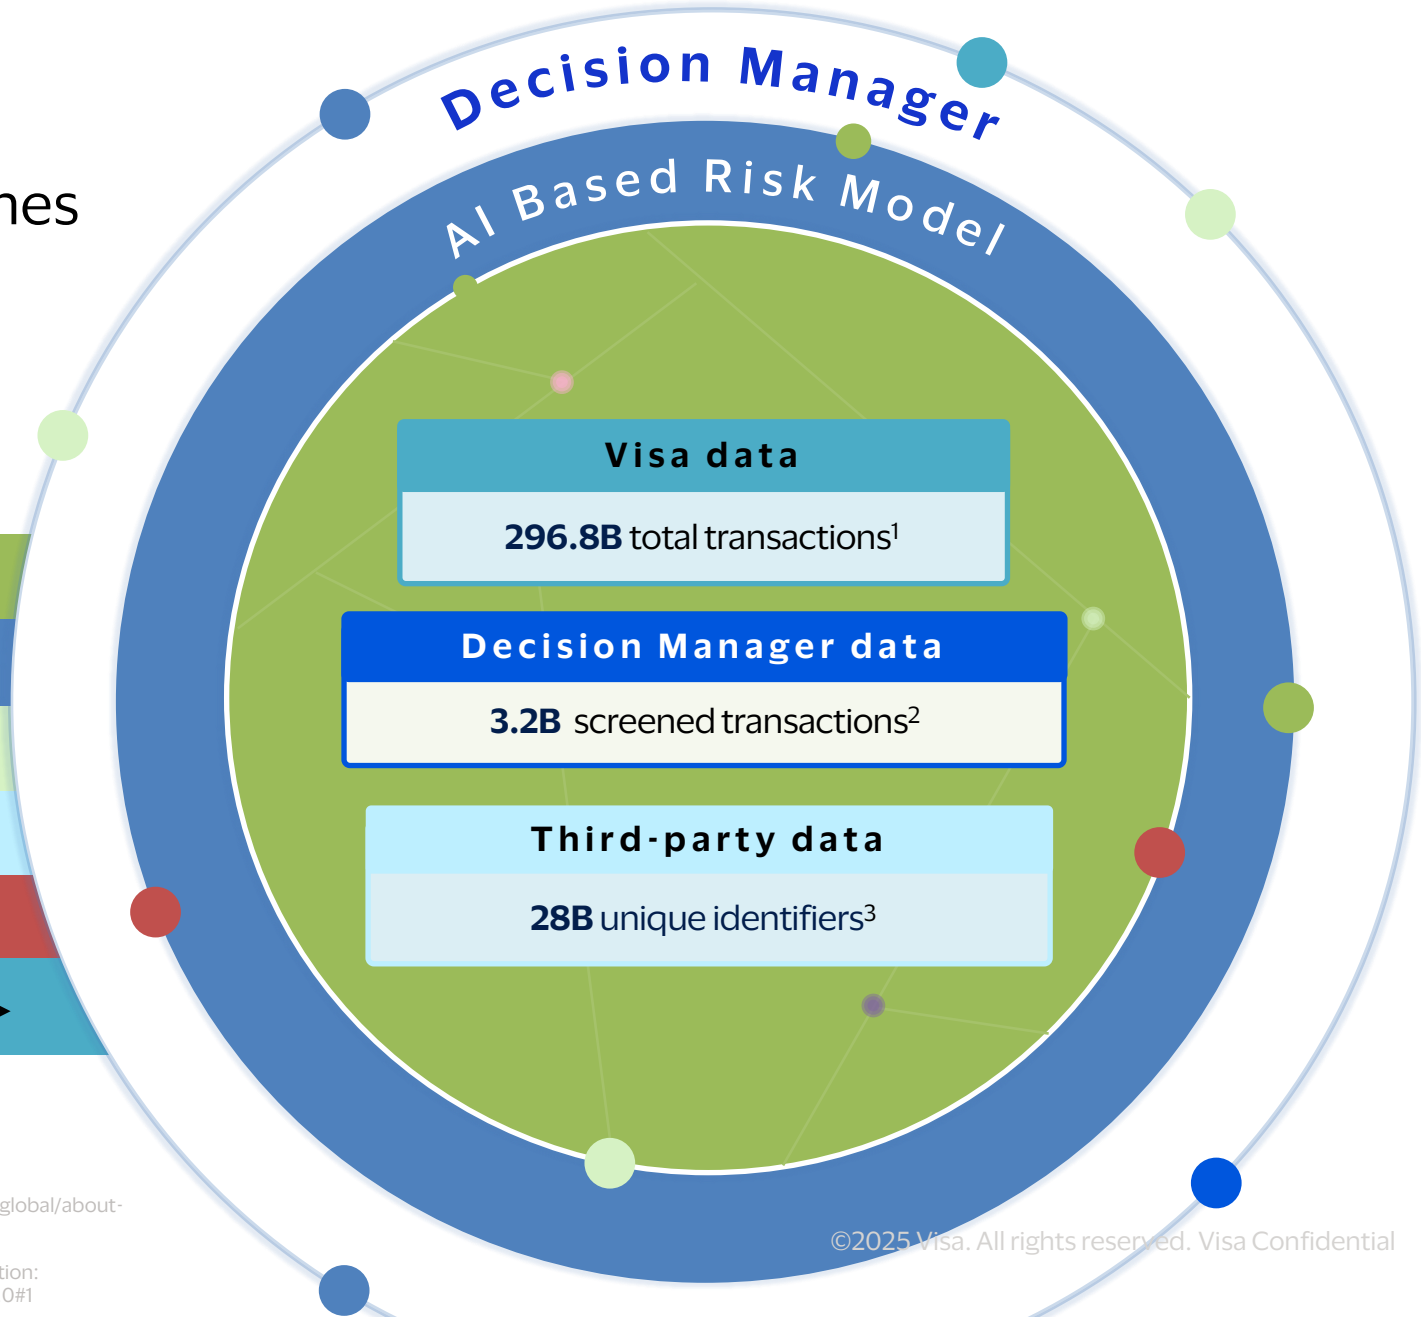

TRANSACTION DATA

# As customers checkout, their transaction is analyzed and becomes part of the broader consortium

TRANSACTION DATA

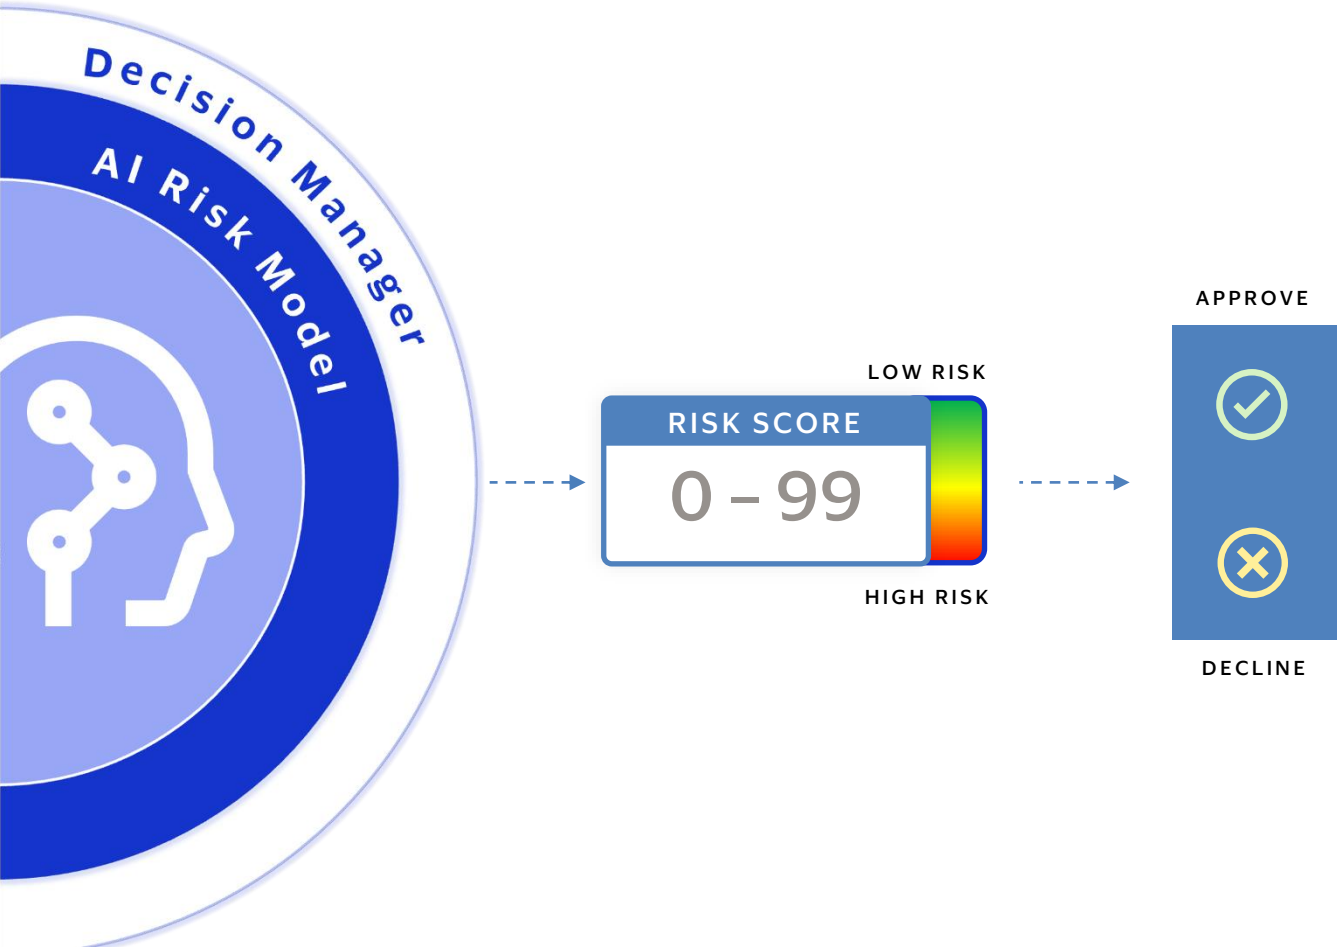

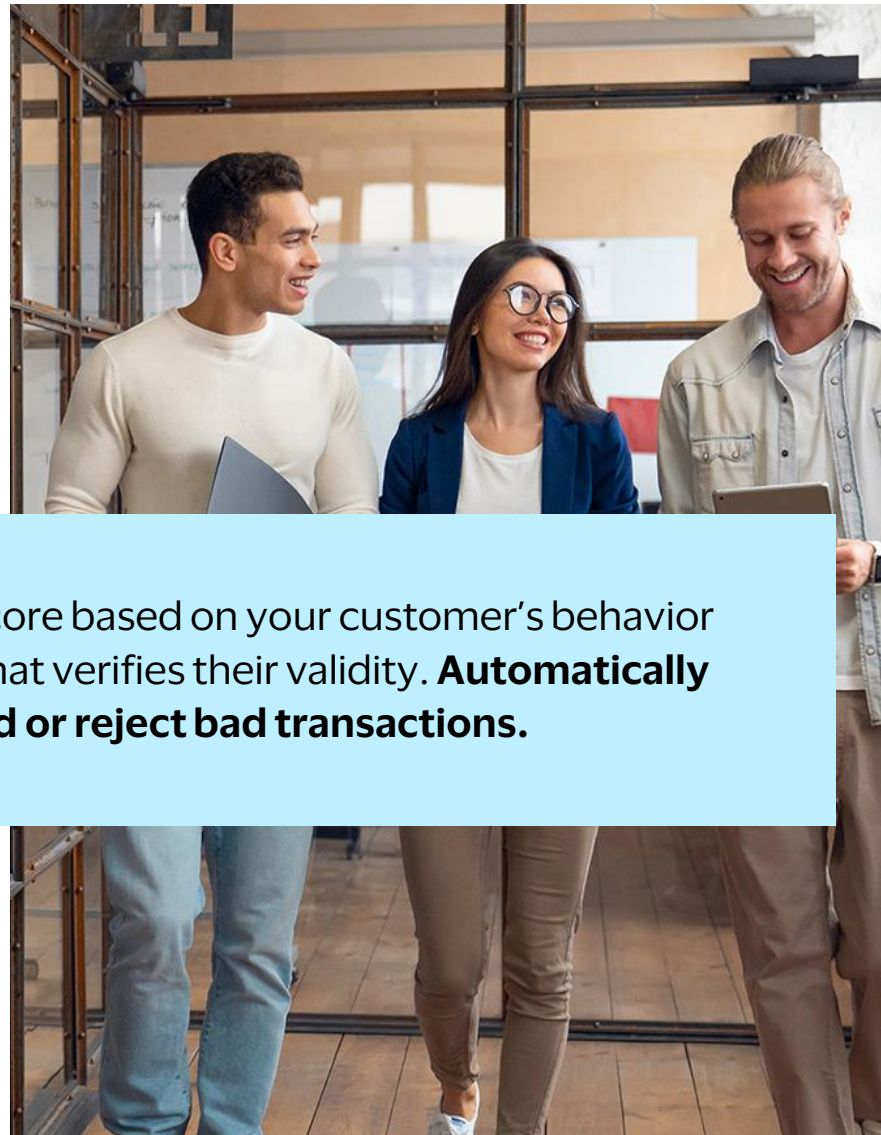

1. FY24 Visa Fact Sheet. https://corporate.visa.com/content/dam/VCOM/global/about-visa/documents/visanet-factsheet.pdf
2. Screened by Decision Manager in 2023.
3. All information on data provided to Visa by Elephant. For more information: https://visa.highspot.com/items/66a12d205c3ca6df30ebddda?lfrm=srp.0#1

Decision Manager
AI Risk Model
Repeat Customer
Device Identifiers
Historical Transaction Risk
Price Range
In real-time, Decision Manager uses **Identity Behavior Analysis** to help identify their dynamic behavior patterns
Historical Fraud and Risk Indicators
Positive and Negative Risk Patterns

# Each transaction receives a **risk score** to help give you the confidence and clarity to automate your acceptance

Receive a score based on your customer's behavior indicators that verifies their validity. **Automatically accept good or reject bad transactions.**

# Automating decisions can help you reduce valuable time spent on manual reviews

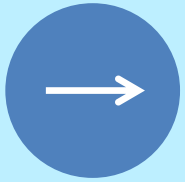

Almost all of Decision Manager's users have moved to full automation

**>98%**

of transactions are decided with automation[1]

1. Percentage calculated based on data collected from all clients using Decision Manager between 1/12/24 to 12/31/24

# Not only can Decision Manager provide insights that help you accept more orders...

...but it also helps give you the **flexibility** to design a strategy that best suits your specific business needs

©2025 Visa. All rights reserved. Visa Confidential

# Don’t limit fraud detection to one rule, **create a more complete risk strategy** based on a transaction’s risk score

Focus on the specific details that matter most to **your unique industry or desired customer experience**

## FLEXIBLE CONFIGURATIONS

Create up to 200 sets of configurations for specific transaction types

## DECISION MANAGER REPLAY

Allows users to test and refine fraud detection rules using historical transaction data before applying them to live transactions

## FOCUS ON THE GOOD

Use IBA’s positive behavior analysis to design your rules based on a customer’s or fraudster’s unique behavior patterns

## ARTIFICIAL INTELLIGENCE

Apply AI/ML models to past transaction data to reveal patterns and automatically suggest new rules and refinements

## VELOCITY CONDITIONS

Prevent enumeration attacks by analyzing the frequency and patterns of transactions

# We're here to help you every step of the way- **Visa Managed Services helps support your current and future needs**

### DO IT MYSELF

# Why partner with us?

## Grow revenue

Recognize and accept good orders with confidence:

**99%**

of transactions are good orders[1].

Our AI is trained to recognize good customers through Identity Behavior Analysis and maximize revenue capture.

## Enable frictionless experiences

- ✓ Customize your fraud and security solutions to meet your business needs.
- ✓ Recognize good customers — returning or new.
- ✓ Reduce friction everywhere customers interact with your brand, from first purchase to dispute resolution.

## Reduce fraud costs

**$22B**

Saved in potential fraud for our clients in FY22[2].

**98.78%**

of Decision Manager transactions are resolved automatically by AI[3].

**99.36%**

Of Decision Manager clients don't use manual review[3].

1.Based on data collected from Decision Manager platform. The fraud rate for all transactions across Decision Manager is 0.5%
2. Represents the value of transactions rejected as fraudulent using Decision Manager in FY22. Normalized for USD
3. Based on average data collected from all clients on the Decision Manager platform between December 2022 and December 2023
Results may vary and are not claimed to represent typical results and experience, and not intended to represent or guarantee that anyone will achieve the same or similar results.
